Spaceballs 2 movie

I've tried a handful of movie list apps, and generally range from comically bad to just competent. This Flixster app, simply titled Movies, has shamed all other apps. Attractively designed, Movies has a smart interface that allows the user to discover which movies are playing, and includes plenty of other neat features. Categories that can be viewed include Box Office, Theaters, Upcoming, DVD, and My Movies. Simple box office lists let you browse by movie title. You see the result of each film on the popular review of the Rotten Tomatoes website, the lead actors, the rating, the length of the film, as well as how much money the film has made so far. If you click on any particular title, you will get even more information, such as showtimes, video link to trailer, photos, synopsis, expanded cast list, reviews and user reviews (you can also add your own review) and links to other film websites. On the Theater tab, you can search theaters in your area either by name or at a distance from your zip code within a 30-mile range. It can also load theaters into Google Maps. The upcoming tab lets you follow movies coming out soon. Both this tab and the one for new DVD releases are as easy to view as the List tab on Box Office and include similar information. My movies allow you to personalize the app, with lists of favorite movies, reviews, pictures, etc. It can also connect and work with websites like Facebook, Flixster and Netflix.The app is not without its drawbacks. Occasionally, the screen load time is a touch on the slow side. Also, the app is known to have problems with some phones, such as HTC Hero. Still, overall, this is a huge app that does a lot of things right. Keep in touch: When you buy something after clicking links in our articles, we can earn a small commission. Keep up to date with the latest daily buzz with the BuzzFeed Daily newsletter! Let me start by apologizing. I am fully aware of how such an article appears – contradictory and bitter. After reading the title yourself, no doubt mentally compose a subtweet, something in harmony with just let people enjoy things! Anyway, I agree. We should let people enjoy themselves! And if you enjoy Hocus Pocus, you could be excused for getting out of this article right now and spending the week until Halloween delighting in an underobtrusive Bette Midler Disney movie with your friends and loved ones. But I have to say my work (especially now that they've announced a sequel), and I'm doing so in the hope that others who were too ashamed to speak out might finally feel free to start whispering their dissent: Hocus Pocus is not a good movie. The characterization is thin, no joke actually lands, and the holes in the plot are so large that you could drive a vacuum through them. It's a cult movie; I can't object to that. As Fondly half-remembering that watching a movie on the Disney Channel came of age, Hocus Pocus began to dominate pop-culture internet discourse. The conversation wasn't actually engaged with the film in any meaningful way; more is said of reminding people that it exists. Remember the Sanderson sisters? Of course you do! Thackery Binx? Who doesn't know! Billy the Butcher? Icon. Hocus Pocus has become the cinema equivalent only in the 90s children will remember this listicle, warmth and comfort nostalgia made manifest, a pleasant shared experience in an era when the cultural diaspora is so wide that common monoculture myths are rare and precious. At that level, I appreciate Hocus Pocus, and I'll happily shimmy on I Put a Spell on You along with the best of them. But – it's big here too, but – Hocus Pocus is not a great movie. It's just not! The characterization is thin, no joke actually lands, and the holes in the plot are so large that you could drive a vacuum through them. I could revisit my former career as a film critic and spend a much longer article detailing everything that's wrong with the film, but it makes absolutely no sense. I don't think anyone really likes Hocus Pocus because it's a good movie; I think people like it because, through the power of nostalgia and internet memes, it has become a cultural tradition, once ironic and now completely honest. If, like me, you're a little bored, and a little flat, and generally meh - I think we're kind of right! Holiday movies become a classic through exhaustion is not new. It's a wonderful life that was almost forgotten until a mistake in writing a copy put it in the public domain, which is cheap for channels to broadcast nonstop around Christmas. People saw it every year, and they had fond memories of seeing it every year, and now it's a proud stalwart entering the Christmas canon. So, again, let me say: if you like watching Hocus Pocus, it's wonderful! But if you don't think that – if, like me, you're a little bored, and a little flat, and generally meh – I think we're kind of right! It's just a good movie! I'm tired of pretending it's a masterpiece because of mediocre Sanderson sister references to the eliest corporate meme accounts. Culture is not something dictated by logic, and so the plea to fill Hocus Pocus's place in the zeitgeist with a better film is not one that can affect any change. But this year on Halloween, since there are no spiked cider parties (please) that require an audience-pleasing film, those of us who suffered because of hocus pocus tyranny finally have a chance to break free. That said, if you're going to take any of the above points from this column, it's got me on it. ParaNorman just dropped on Netflix and that's great. You can even watch it with children if necessary. Give ParaNorman a chance. Hocus Pocus will still be there for you next year, if that's what you want. In Just Why, Dana Schwartz examines the strange and sublime pop culture moments under discussion internet this week. Week.
